Top Skills

WiX Toolset
.NET Core
Windows Presentation Foundation
(WPF)

Languages

Spanish (Native or Bilingual)
English (Professional Working)

Certifications

Certified in Cybersecurity (CC):
Security Governance, Policies, &
Controls
Certified in Cybersecurity (CC):
Incident Response
Certified in Cybersecurity (CC):
Security Best Practices & Security
Awareness
CompTIA Security+: Practical
Cryptography
Certified in Cybersecurity (CC):
Networking & Security Infrastructure

Gerardo Diaz Hernandez

Senior Software Engineer | Backend & Security Operations
Daytona Beach, Florida, United States

Summary

Senior .NET Developer and Security Champion with over 9 years of experience in high-performance software engineering and security compliance.'

Experience

Johnson Controls

5 years 9 months

Security Champion

October 2024 - June 2026 (1 year 9 months)

Florida, Estados Unidos

Security Leadership: Acted as the designated Security Champion, bridging the gap between development and infosec by embedding secure-by-design principles directly into the software architecture.

Threat Modeling: Spearheaded threat modeling initiatives across the software development lifecycle (SDLC) to proactively identify vulnerabilities and mitigate risks before production.

Data Hardening: Hardened application data processing by securing XML serialization/deserialization workflows and enforcing strict read/write access controls to prevent injection and tampering.

Artifact Integrity: Implemented robust application security measures, including automated code signing with cryptographic certificates for distributed DLLs to guarantee payload integrity.

DevSecOps & CI/CD: Integrated secrets management into deployment pipelines, utilizing secure environmental variables to dynamically handle credentials during automated MSI installer generation.

Software Developer

October 2020 - June 2026 (5 years 9 months)

Ормонд Бич, FL

- * Orchestrated the transition to WIX Toolset, automating deployment pipelines and reducing cycle time by 30%..
- * Developed a GraphQL middleware library to automate a key partner's refrigeration process, creating a new monthly revenue stream through a fully automated service, eliminating the need for human intervention.
- * Converted a console application to a Windows service using TopShelf and developed a WPF UI for interaction, improving system reliability and reducing downtime by 40%.
- * Conducted research and developed a proof of concept integrating Twilio and Braintree services, enhancing product functionality and reducing payment processing time by 20%.
- * Upgraded WIX installer from version 3.14 to WIX 5, streamlining installer creation and improving deployment efficiency for .NET Core 8 projects by 35%.
- * Led a major refactor upgrading projects from .NET Framework 4.8 to .NET 8, improving system performance by 30% and modernizing communication protocols with gRPC and SignalR.
- * Replaced TopShelf with HostedService for the .NET 8 Windows Server project, simplifying service management and reducing maintenance overhead by 25%.
- * Revamped the Install Maker project, upgrading to WIX 5 and reducing MSI creation steps from four to one, cutting packaging time by 50%.
- * Resolved a critical bug affecting key operations, improving system reliability by 40% and earning commendations from customers and management.

CiiRUS Vacation Rental Software

Microsoft .Net developer

October 2019 - March 2020 (6 months)

Celebration, Florida, United States

- Developed a user-friendly feature for property duplication, significantly streamlining the property creation process and enhancing user experience, leading to a 20% increase in client productivity.

- Contributed to the development of RESTful WebAPIs using .NET Core, significantly enhancing system interoperability and data exchange for Ciirus One products.
- Leveraged DevExpress to create comprehensive, data-driven reports on MVC and .NET Core projects, providing valuable insights for decision-making.
- Provided critical support for Ciirus One, resolving bugs and enhancing system performance, leading to increased system stability and improved user satisfaction.
- Utilized advanced controls such as DevExpress and Bootbox for modal dialogues, significantly improving page interactivity and user experience.

Innova4J

Software Developer

January 2017 - June 2018 (1 year 6 months)

Colombia

- Conducted major refactoring of front-end and back-end code for SerhsTourism's online booking system (UXBOL2.0), improving system performance and user experience.
- Enhanced back-end objects managing hotel information display, optimizing data presentation for users.
- Developed an integration with AddonPayments for online booking, implementing a Hosted Payment Page for streamlined payment processing. Also conducted unit testing and HPP reference by AddonPayments.
- Automated testing of major online booking features such as city, country, and hotel searches, as well as hotel booking and park ticket reservation, using Selenium.
- Developed a customizable banner manager for the online booking system, allowing banners to be displayed based on language, country, client type, and specific dates.
- Created a Windows service to retrieve client order data from the Studio F App on Amazon Web Services S3, enabling order creation in regions affected by the Great Firewall of China.
- Developed an ASP.Net library for Bpulse using Google's Protocol Buffer, providing methods to send data pulses to BPulse servers, enhancing data exchange capabilities for .Net projects.

FG CONSULTORES, C.A.

Software Developer

May 2015 - December 2016 (1 year 8 months)

Venezuela, Carabobo, Naguanagua

- Integrated the administrative system of Jose Antonio Paez University with SAP Business One's accounting processes, enhancing financial management efficiency. Utilized SAP B1 SDK DIA API, C#, Linq, and SpecFlow.
- Developed a Windows Service to connect to the SQL Server Database of the JAP Administrative System, enabling the creation of invoices, credit notes, debit notes, and incoming payments in SAP Business One using SAP B1 DIA API.
- Developed an accounting localization Add-on for SAP B1 for Bolivia, modifying tax calculations according to Bolivian tax laws. Utilized SAP B1 DIA API and UI API to create new fields in the SAP B1 user interface and modify the behavior of predefined fields.

Administracion Grupo Pronto C.A.

Web Development Intern

April 2014 - May 2015 (1 year 2 months)

Caracas, Federal District, Venezuela

- Developed an intranet system for generating over 16 types of reports for insurance analysts, enhancing data accessibility and decision-making processes. Utilized C#, Web Forms, ADO.NET, Linq, and SQL Server 2008.
- Created T-SQL queries and stored procedures to retrieve information from multiple servers simultaneously, improving data retrieval efficiency.
- Developed web views with filters to call stored procedures, display data in a grid view, and enable data download in Microsoft Excel format, improving data visualization and accessibility.

Education

Universidad Nacional Experimental Politécnica de la Fuerza Armada
System's Engineer, Systems Engineering · (2010 - 2015)
